

ANIMAL BEREAVEMENT

WHAT HAPPENS TO US WHEN OUR PETS DIE?

Many of us may have experienced the pain of losing a beloved animal at some point in our lives.

During this workshop, we will help you to understand the stages of the grieving process that we all go through, to a greater or lesser degree. We will explore what is meant by complicated grief and different types of grief.

We will also share a range of ways of helping and supporting ourselves and our clients through these losses.

We encourage, and ask you, if you feel comfortable, to share your experiences throughout the day to support everyone's learning.

You will receive a CPD certificate for 6hrs of training

Complementary tea, coffee and biscuits will be available.

Please bring your own lunch.
